Summary

Backend and Cloud Engineer based in Sydney with a year of experience building Go services on GCP. I'm a Google Cloud Certified Professional Cloud Developer and have worked across the stack, from infrastructure-as-code to API design. I came to engineering from a quantitative background, which shows up in how I think about performance, reliability, and cost.

Experience

Software Engineer (Contract) | Union Mate

Feb 2025 – Jan 2026

- Migrated 5 Python services to Go on Cloud Run, reducing memory per instance and cold-start latency. Added bounded worker pools to cap concurrency under burst traffic. Combined, the changes brought P99 under 300ms (~60% improvement) and cut monthly GiB-seconds by ~40%.
- Modernised deployment security by replacing long-lived keys with OIDC federation.
- Built the document ingestion pipeline for the SaaS prototype. Benchmarked chunking strategies and embedding models against a client-validated golden dataset, iterating until retrieval quality passed client acceptance.

Projects

Real-time Waze Alert Scraper and Analytics Dashboard | Go, Terraform

- Automated the archival of cold Firestore data to GCS, reducing NoSQL read operations by up to 86% per request.
- Imported existing GCP resources into reusable Terraform modules.
- Developed Go REST APIs with token-bucket rate limiting to guard resources.
- Implemented integration tests using Firestore emulators.

WhyHireLeong.com | Go, TypeScript, Next.js

- Implemented a chat interface using Next.js and streaming response handlers to render LLM tokens immediately upon generation.

Skills

Languages: Go, Java, SQL, Python

Cloud & Infrastructure: Cloud Run, Firestore (NoSQL), GCS, Vertex AI, Pub/Sub, IAM & Security Policies

DevOps, Tools & Concepts: Terraform, Docker, GitHub Actions, RAG, Git

Certifications: Google Cloud Certified – Professional Cloud Developer

Education

The Australian National University

Bachelor of Actuarial Studies

Graduated Jan 2025

Bachelor of Finance (Quantitative Finance)

Graduated Jan 2025

Leadership & Professional Development

Senior Resident | The Australian National University

Jan 2023 – Dec 2023

- Managed escalation and incident response across a residential cohort of 26.
- Earned two scholarships (\$16,000 in 2023; \$4,000 in 2020) for contributions to collegiate life and academic excellence.

Administrative Support Assistant | Singapore Armed Forces

Jul 2020 – May 2022

- Managed scheduling and end-to-end logistics for officer training programs and service medal ceremonies, ensuring operational readiness and adherence to protocol.
-
